## Siena

Siena is an innovative woven fabric made from 60% recycled PET and a further 40% polyester. It combines the high performance properties of a synthetic fibre fibre with the ecological claim of reducing our mountains of waste. Siena is certified according to the Global Recycle Standard. The fleece lamination on the underside is even made from 100% recycled PET. In addition, Siena is pleasantly soft and has a slightly mottled, matt colouring that gives the surface a sophisticated look with more depth. With 100,000 abrasion cycles, Siena is particularly hard-wearing. Its lightfastness and rub fastness of 4-5 also exceed the requirements of the German Quality Association. In addition washable up to 30%. We recommend dry cleaning. It passes the cigarette test according to BS 5852.

Category C

60 % RPET, 40 % PL

Abrasion cycles: 100.000

Light resistance: 4

Pilling information: 4 to 5
